Shrubs

The best alternative to Blueberry which won't grow well in the Rocky Mtns. Is LONICERA CAERULEA, commonly called Honeyberry, native in Siberia. It likes poor high alkaline soil & is rated Zone 2/3. University of Saskatchewan led the way in its production. We import most of them directly from Canada. 2 different varieties are needed for pollination.

Lonicera c. BOREALIS	2 Gal		\$ 32	\$ 24
Lonicera c. Indigo Gem	2 Gal		\$32	\$ 24
